• Provide validated software and automation systems to meet the laboratories requirements (life sciences, cosmetics, pharma)

• Versatile and with a strong experience gained in startup and international companies : project management, R&D, systems integration, validation, transition to mass production, support, acting as internal or external consulting team member.

• Direct (5 people) and cross-functional management of international and multidisciplinary teams

## EXPERIENCES

### IT Project Manager – Medical Affairs (Infogene)

IPSEN - Since February 2023 - France

- BUILD
  - IT project management for :
    - Information Request Management System (IRMS)
    - Medical and Scientific publication program
    - Investigator Sponsored Studies (ISS)
  - Deliverables : Specific developments, system updates, data migrations and backup after company acquisitions.
- RUN
  - Lifecycle management of the IT solutions, incidents and change management (vendors and TMA)

### Project Owner (Infogene)

L'Oréal - October 2021 to December 2022 - Consultant - Chevilly-Larue - France

For the global system tracing the stability studies of all L'Oréal products :

- Deployment in all R&I departments : make-up, hair (style, colors), fragrance, aerosol, skin care, solar
- Gathering of new requirements, definition of specifications
- Definition, implementation and update of the stability protocols in the system (>100)
- Verification of the IT deliverables (build and run)
- Worldwide Users Training (>200), change management
- System administration (>1300 users)
- Synchronisation and support to R&I teams, Quality, Digital, IT, TMA
- Management of incidents, service requests and priorities
- Reporting (CoreTeam, Copil)

### Project Manager - Project owner

Infogene - Since 2021 - France

### Project Manager - R&D Coordinator

Diagnostica Stago - 2017 to 2020 - Gennevilliers - France

- Technical coordination and program management for the development and launch of a strategic new product line :
  - More than 5 instruments with consumables, accessories, packaging – more than 30 reagents - 2 software
  - Monitor the subcontractor's developments of our modular and scalable systems + multiplatform reagents (>10 international partners)
  - Ensure the cross-compatibility of the new systems within the existing software environments (on both internal and customer sides)
  - Achieved : delivery of serial and pre-serial systems for the validation studies
- Industrialization of 2 instruments (Germany) as OEM products

### Project leader - Systems validation

Bio-Rad Laboratories (Clinical - Blood virus) - 2007 to 2017 - Marnes-la-Coquette - France

- Management of a validation team for In Vitro Diagnostic systems :
  - Validation of an innovative high-throughput and multiplex system for blood banks – Technical expertise and support for project teams and the external evaluations – 2 patents, validated pre-serial instrument
  - Validation of a system dedicated to blood infectious disease detections, CE registration and field support
  - More than 5 validations of new biological kits (qualitative and quantitative)
  - Change control management (hardware, firmware, software, biological) of the product range
- Management of IVD R&D projects in compliance with the planning, the costs and the stakeholders requirements

## International technical support expert

Bio-Rad Laboratories (Lifescience - Food) - 2004 to 2007 - Marnes-la-Coquette - France

- Creation and management of the worldwide technical support for the 7 systems of the Transmissible Spongiform Encephalopathy product line (Bio-Rad #1 for this market) :
  - In charge of the monthly technical committees with suppliers, change control management (new features, obsolescence)
  - Technical trainings for the external and internal teams, creation of the online technical support portal
  - Interface between the instrument's manufacturers, the biological R&D, marketing teams and WW subsidiaries
- Validation of a new platform, technical support for the product range in the field
- Installation and qualification of 10 international "mad-cows" laboratories + local teams trainings

## Software Engineer

Genomic - 2002 to 2004 - Archamps - France

Software development for automated instruments dedicated to research laboratories :

- Programming interface and operating system for a versatile liquid handler
- Multitask operating system and Graphical User Interface for the production line of the Pall GeneDiscs (molecular diagnostic kits / GeneSystems)
- Image acquisition and analysis system
- Main languages : Eiffel, C, VBA, VB6

## SKILLS

- Medical device, In Vitro Diagnostic, Cosmetic, Pharma
- Direct and cross-functional management
- Risk Management
- English (fluent)
- Complex project management, reporting
- Product Lifecycle
- EIA, chemiluminescence, fluorescence, hematology

## EDUCATION

### Master of science - Physiological and Computer Engineering

UNIVERSITÉ DE POITIERS, WITH HONORS

1999 to 2002

### Bachelor of science - Biochemistry

UNIVERSITÉ LYON 3

1998 to 1999

### Further education

DEMOS, CEGOS, LNE

Direct and cross-functional management / Behavior profiles / Conflict management  
AGILE / Requirements management / Priorities management  
MS Project / Statistical tools / Experimental design / Patents

## INTERESTS

Mountain sports - Computer sciences and high techs
